

## Drills

Our range of drills come in different diameters and flute lengths. Our drill part numbers begin with a 'D' and then followed by a number. The number represents the diameter of the PCB drill.

D3.05 = 3.05mm diameter PCB drill

We also offer extended flute lengths of 12mm and 16mm. This is added onto the diameter part number.

D3.05-12 = 3.05mm diameter PCB drill with a 12mm extended flute length

## Routers

Our range of PCB routers begin with 'M' and followed by a number which represents the diameter of the router and the type of router. Please see below:

M3.175-DC = 3.05mm diameter, diamond cut router

We also offer extended flute lengths of 12mm and 16mm on our routers. This is added onto the diameter part number.

M3.175-DC-16 = 3.175mm diameter, diamond cut router with a 16mm flute length
